

Sinne Eeg

In the course of the past few years Sinne Eeg has taken over the throne as Denmark's leading jazz vocalist, partly with the help of her outstanding, critically acclaimed album "Waiting For Dawn"

Sinne Eeg's new April CD release, "Kun en drøm", also drew richly deserved praise from a range of unanimous reviewers to demonstrate that this hot Danish jazz vocalist is well on her way to an international breakthrough.

The English version of "Kun En Drøm" ("Remembering You), will be released worldwide later this year by Red Dot Music/EMI. Sinne Eeg's interpretations of Danish pop classics and English songs are personalized in a highly unique way. Her vocal style is mature, intense, slightly understated and yet very ambitious, and not least, extremely talented. It is this talent and her dark, sonorous vocals that are taking Sinne Eeg all the way to the top.

Her sources of inspiration include Sarah Vaughan, Betty Carter, Dinah Washington, Miles Davis, Keith Jarrett, Chet Baker and Oscar Peterson.

Here is a *"fully mature artist who dares to take chances and follow her own instincts, successfully lending credibility to whatever she sings."* Politiken
